Date of birth: 21/08/1990 | Gender: Male | Nationality: Kenyan | Phone: (+49) 15565539808 (Work) | Email address: edkimnjoroge@gmail.com | Website: edkimnjoroge.github.io/portfolio | LinkedIn: [edkimnjoroge](https://www.linkedin.com/in/edkimnjoroge) | Address: 71083, Herrenberg, Germany (Home)

About myself

IT Systems & Application Support Specialist (IT-Systembetreuer / Anwendungsbetreuer) with a full-stack development foundation. Proven in ERP/CRM support, SaaS tenant setup, Linux/cloud administration, and zero-error data migration (700+ records). Comfortable across the stack: configuring production infrastructure, debugging application issues, and extending systems with code when needed — Laravel, Node.js, React, REST APIs. Experience spans founding-team environments and established operations: building from zero, stabilizing legacy systems, and bridging technical teams with end users. Based in Germany, available immediately.

Skills

IT Systems & Support | Office IT support | Support documentation | Staff onboarding | Access rights | Router and internet setup | Printer and device setup | OS installation and setup | Technical troubleshooting | User support

Infrastructure & Cloud | Windows, GNU/Linux, MacOS | Oracle Cloud | AWS | cPanel/WHM Control | Domain management | DNS | SSL/TLS | Cloudflare | Server monitoring | Security checks | MySQL/MongoDB | Backups | Database maintenance

Business Applications | ERP/CRM systems | SaaS tenant setup | User roles and permissions | Workflow configuration | Data migration | System documentation | Client onboarding | Staff training

Software & Automation | PHP/Laravel | Node.js | React | Flutter | REST APIs | Workflow automation | n8n | RAG-based AI assistants | AI-assisted development

Work experience

IT Systems / Application Support Lead | Qodesystems | 01/03/2025 - 01/10/2025 | Nairobi, Kenya

- Led systems and application support for MarkerpulseOS, a multi-tenant SaaS platform (ERP, CRM, HRM, POS).
- Migrated Wideoptions Melamine from internal ERP/CRM to MarkerpulseOS: tenant setup, data migration, access rights, workflow configuration, testing, post-migration support.
- Built platform infrastructure from founding stage: Linux hosting, domains, DNS, SSL, databases, monitoring, backups.
- Onboarded SaaS tenants: user setup, access rights, company settings, workflow configuration.
- Created internal documentation, user guides, and support notes.
- Provided application support, issue investigation, troubleshooting, and technical fixes across production environments.
- Remote advisory support for complex infrastructure and deployment issues (Occasional, 10/2025–present)

Business Systems & IT Support Developer | Wideoptions Melamine Limited | 20/06/2024 - 29/03/2025 | Nairobi, Kenya

- Built and supported internal ERP/CRM platform: customer management, sales, inventory, manufacturing, HR, operational workflows.
- Set up staff accounts, user roles, permissions, system workflows, and daily-use processes.
- Created system documentation and user guidance to reduce repeated support requests.
- Migrated 700+ customer records, supplier records, 600+ product records, and inventory data from manual/legacy processes with zero data loss.
- Supported transition from internal ERP/CRM to MarkerpulseOS: data continuity, workflow preservation, staff access, daily operations.
- Provided troubleshooting, database maintenance, server monitoring, bug fixes, and ongoing post-deployment support.

Business or sector Manufacturing

IT Technician / Network Installation Support | ByteBridge Innovations | 01/07/2023 - 01/06/2024 | Nairobi, Kenya

- Supported Starlink internet installation and support business for residential and commercial clients.
- Installed, configured, and supported internet connectivity, routers, network equipment, and Starlink kits.
- Troubleshot connectivity issues, advised clients on setup options, provided after-installation support.
- Part of founding team: technical setup, client communication, purchasing, scheduling, support coordination.

Freelance Software Developer & IT Consultant | Self-employed | 20/01/2015 - 10/06/2024 | Nairobi, Kenya

- Project-based software development, IT support, and technical consulting for SMEs and individual clients.
- Built and maintained websites, e-commerce systems, and business applications (Laravel, Flutter).
- Supported clients with software installation, hardware troubleshooting, hosting, domains, email, website maintenance.
- Helped small businesses adopt digital tools and maintain online systems.
